

Dale Youngs

Vice President of Technology

More than 30 years of experience in technical leadership and project management in aerospace manufacturing, leading to the successful growth of the company's technical lines, associated profitability and effective project execution.

Since joining the NMG team 30 years ago, Dale has held the positions of Design Engineer, Director of Engineering, Site Leader in Colorado Springs and Vice President of Technology. In his current role, he is responsible for the tools and processes used in the technical community, as well as the compliance associated with US export law. Prior to joining NMG, Dale held a design group lead position at Boeing, working on the 777 aircraft escape system and an engineering lead position at BFGoodrich Aerospace, now part of Collins Aerospace.

He has a passion for effective project management and for exploring emerging technologies that could either enhance current product offerings or allow for the development of proprietary products that fit our "Smart Growth" strategy. He also enjoys lending his time and sharing his experience through mentoring others in technical roles within the organization.

He is a graduate of the Arizona State University School of Engineering and holds a Masters in Business Administration from Kent State University. He has continued to develop his skills through the Leadership Development Program at The Center for Creative Leadership (CCL) and by completing a Project Management Certificate through Baldwin Wallace University. He has also completed many hours of training to help develop processes that ensure we have a robust export compliance program in place.

Dale and his wife Lisa have been married 40 years and currently live in Chandler, AZ. They have two adult children and four grandchildren. They share a passion for influencing the next generation and have been active in leadership with BSA and youth ministries in their church.
